

GLENPROLIUM

Amprolium Water Soluble Powder

GLENPROLIUM

Amprolium Water Soluble Powder

Glenprolium is a coccidiostat (antiprotozoal) used for the treatment and prevention of all types of coccidiosis in chickens (broilers and breeders) and other fowl such as turkeys, with activity against *Eimeria* spp., especially *Eimeria tenella* and *Eimeria necatrix*. Vitamins are essential for the proper operation of several physiological functions.

Benefits:

- Protect birds from coccidiosis & improve productivity
- The Original anticoccidial treats cocci - stop production loss
- Blocks the parasite's ability to uptake and multiply
- Prevent and treat intestinal coccidiosis

Indications:

- Clinical signs include mucus-like or bloody diarrhea, dehydration, anemia, listlessness, ruffled feathers, stunted growth, and death
- Coccidiosis is also commonly associated with a drop in egg production
- As a therapeutic and prophylactic use in intestinal & caecal coccidiosis caused by various species of *Eimeria* spp

Recommended Dosage:

Broilers/Breeders/Layers : 20 gm per 20-40 Liters through drinking water for 5-7 days or 500 gm per ton of feed or as recommended by Veterinarian
