

# **GLENTOXX**

An Authentic Toxin Binder

# GLETOXX

## An Authentic Toxin Binder

A Glentox refers to a substance added to poultry feed in minute quantities that is able to neutralize or immobilize harmful chemicals, mycotoxins or endotoxins (lip polysaccharides) within a bird's gastrointestinal tract, thus avoiding negative consequences. A mycotoxins binder is a substance that is added to animal feed in small quantities in order to trap mycotoxins, preventing them from entering the blood stream where they can cause serious harm to animals.

### Benefits:

- ◆ Increasing bodyweight and improvement of feed conversion rate in broilers
- ◆ Reduces the damage from the contaminated feed
- ◆ High mycotoxins adsorption capacity
- ◆ Bind and immobilize mycotoxins in the gastrointestinal tract of birds, thus reducing their bioavailability

### Indications:

- ◆ Ability to bind a wide range of mycotoxins
- ◆ Biodegradable and environmentally friendly after excretion
- ◆ No binding affinity for vitamins, minerals, drugs and other nutrients
- ◆ Rapidly and uniformly disperses in feed during mixing
- ◆ To improve protein digestion

### Recommended Dosage:

Broilers/Breeders/Layers: 1 to 2 Kg Per Ton Feed

### Pack Size:

25 Kgs

### Composition:

Each Kg Contains

H S C A S	720 gm
Activated Charcoa	120 gm
Ammonium Format	15 gm
Citric Acid	10 gm
Calcium Propionate	20 gm
M O S	50 gm
Sodium Bentonite	20 gm
